Diabetic Care Protocol

- Step 1: Exfoliating Lotion**
Apply once nightly to legs, heels and feet for skin restoration.
- Step 2: Moisturizing Crème**
Massage directly into skin every morning for skin hydration. Multiple applications can be used during the day.
- Step 3: Shoe & Insole Hygienic Refresher Spray**
Spray shoes, orthotics or insoles daily to reduce the risk of infection and re-infection.
- Step 4: Arnica Ice Soothing Gel**
Massage into skin morning and night to increase blood flow and reduce neuropathy. Wash hands after application.
